

stamp act which is \$1.10 per thousand for any property that they transfer to an individual. But, individuals have to pay the \$1.10 a thousand if it is transferred to a city or a public subdivision. This merely removes that restriction. The reason for it is that when you make an agreement with the school district, the city or someone else, for a \$5,000 piece of property then find out that they have to pay the additional and then they say that deal is off and the city and the school district picks it up anyway. This merely removes that restriction. I doubt that there would be \$50 to a \$100 involved in the whole thing. There was no opposition to the bill at all. It merely clarifies and makes it easier to transfer the property in those cities. I move for the bill.

I would like to have the bill laid over. We thought that it....I ask unanimous consent to have the bill laid over because we probably wouldn't finish it today anyway?
